APPS List

APPS FOR CREATING BOOKS

1. **Book Creator is Free for one book** – I like the app downloaded onto an iPad and purchase the app so you can make multiple books. It can be used for so many projects.
2. **Canva another great book layout tool, it's free most schools.**

APPS FOR TEXT TO IMAGE.

Many APPS have a free trial. Many APPS have age restrictions, not to be used by children under 13 years of age. I use these with my login to demo the use of AI for younger students. I log in and then use their prompts and we discuss the results as a group or class. DEMOS are great, as they enable teachers to set up protocols and best practises. This is by far the best way to go.

1. **DALL·E** Just use ChatGpt and a back slash to access DALL·E .
   What it does: Generates high-quality AI images from text prompts directly within ChatGPT.
   Why it's safe: Built-in safety filters to block inappropriate content. No public gallery. Used in a closed environment via ChatGPT Plus, making it safer than many open image generators. FOR Teacher Demo only with students younger than 13.
   Link: https://chat.openai.com
2. **Canva** – although I have found some districts have removed AI generated content options, so you would need to check this. AI-powered text-to-image with **education-safe** filtering.
   Why it's safe: **COPPA-compliant**, **teacher-managed** accounts.
   Link: https://www.canva.com/education/
3. **Adobe Express for Education**:
   Schools can provide access to students **under 13** through **Adobe Express for Education**, which is **COPPA-compliant** and designed for classroom use. Many schools may have AI restrictions on Adobe Express AI components. **Link:** https://new.express.adobe.com/
4. **Night Café** AI-assisted image generation using simple prompts.
   Why it's safe: Teachers can set up a classroom mode for supervised use. You can build up credits at a rate of 5 per day. You can build up a credit bank.

APPS FOR VIDEO & VOICE

1. Pika Labs https://pika.art/ Great for stills to 5 sec video.
2. Kling AI https://klingai.com Great for character animation and lip synch
3. Eleven Labs https://elevenlabs.io/ Great for voice overs
4. D-ID https://studio.d-id.com/ Great for lip Synch, characters need to be facing directly to the front. No side angles.

APPS FOR CREATING VIDEOS

1. **iMovie iPad app Easy to use – my preferred app for starting out. FREE use this one.**
2. **CapCut –** FREE option Can be used in the Browser or downloaded
3. **DaVinci Resolve** FREE version available, for advanced users. Needs to be downloaded.

Of course there are many more APPS out there, these are a few of my favourites.
