

AMAZING STORIES

AMAZING STORIES with Some Monkey Business!

*A picture book series for wildly curious, brave
& brilliantly creative kids.*

By Cathy Brown

*A sell-ready children's IP combining books, videos, & classroom
content, fully owned and ready for international licensing.*

1. Series Overview

Amazing Stories with Some Monkey Business! is a cheeky, charming & wildly imaginative series of five picture books powered by curiosity, chaos & creativity, for kids who think differently.

Each story is built on bold ideas & brought to life through a unique Human-AI collaboration, mixing classic storytelling with cutting-edge AI.

2. The AMAZING STORIES

A NEW Jumper Packed with humour, repetition & just the right amount of monkey business, this story is perfect for early readers, with a twist that'll leave kids giggling.

Themes: Persistence, choice, frustration, surprise & confidence.

What a Disaster! This Book Should be Banned - Too Frightening for Most Kids Take a deep breath... because What a Disaster! is pure chaos! Packed with over-the-top disasters, comedic timing & an unstoppable protagonist, this is the story of someone who refuses to give up, no matter how many times they get squashed, melted or EXPLODED.

Themes: Persistence, resilience, agency. Life isn't just unpredictable, it's outrageously unfair, ridiculously chaotic and totally unstoppable. Disasters will come. Big ones. Weird ones. Ones that make absolutely no sense.

AMAZING Worlds A book like no other, where imagination and reality collide.

When a glowing portal appears, our young dreamer steps inside and discovers that what they write becomes real. Each new page reveals a breathtaking world, imagined into being: Sky Islands of Everfloat, Glacial Symphony Caverns, Galactic Garden of Lost Stars.

Themes: The magic of writing, creative power, imagination and agency.

UnLIKELY! A hilariously imaginative tale packed with skateboarding turtles, sock-powered cities & rainbow waterslides. Told by a fearless dreamer & doubted by a sceptical sidekick, this story proves the most unbelievable ideas might just be... likely after all.

Themes: Possibility, optimism, imagination, creativity, friendship, daring to dream differently.

The MONKEY Did It! One moment it's cereal time. The next, pirate ships, alien toes & dragon rides. In this chaotic, laugh-out-loud adventure, a rogue monkey hijacks the story... and absolutely anything can happen. And probably will.

Themes: Curiosity, creativity, breaking the fourth wall, problem-solving, unpredictable outcomes.

What do YOU Like?

A celebration of curiosity, imagination & the weird, wonderful things that make us who we are. Everyone likes something different. Trains, trampolines & even lawnmowers.

In **What Do YOU Like?**, kids are invited to follow **what makes their brain go WOW.**

This book shows that the quirky things we love aren't just hobbies, they're clues to who we might become.

Themes: *Passion & identity, Divergent thinking, Creative confidence, student agency through joy.*

3. Series Features

Big Ideas for Little Readers: Critical thinking, creativity, imagination, resilience, persistence, agency

Human-AI Collaboration: Real storytelling, imagined visuals-nothing exists until it's created

Multimedia Universe: Animated read-alouds, lesson activities, classroom prompts

Cheeky, Clever & Real: Kids see themselves reflected in the chaos, curiosity & courage.

4. The Audience

Kids aged 4-12 with wild imaginations and a love of fun

Teachers looking for playful, meaningful picture books

Parents who want to spark conversation, not just bedtime yawns

Schools & libraries seeking stories that reflect creativity, AI literacy & emotional growth.

5. What Makes Amazing Stories Different

Not nostalgic These books speak to the now-tech-literate, visually rich, funny & thoughtful.

Not predictable There's always a twist. Or a monkey. Or a reality-warping notebook

Not just videos This is a whole world of voiceovers, books, lesson plans & character-led engagement.

6. About the Creator

Cathy Brown is an experienced educator, writer, and creative technologist who has spent decades helping kids unlock their creativity.

Producer of over 250 educational videos and podcasts

Founder of Virtual Teacher and creator of Super Task AI learning tools

Pioneer of ethical, exciting & low-risk AI in education

7. Distribution & Potential

5 completed books - fully illustrated, ready for print or digital release

Matching animated videos with narration

Classroom resources for schools: writing prompts, lesson plans, teacher packs

All content is cross-promotional and IP-consistent

8. Now Seeking

Book distributors (digital or print)

Children's media buyers for broadcast or streaming, platforms like Netflix, ABC Kids.

Educational content licensors - primary schools, EdTech platforms

Distribution reps with access to publishers, networks or bundling opportunities

9. Let's Imagine Something Amazing

These stories don't tell kids what to think.

They show them how to imagine, create, break stuff, laugh, try again & take charge.

It all just might start with a glowing circle, a blank page... and a monkey.
