

AI or Not?

Can you tell the difference between AI-generated images and real images?

Train 1

Train 2

Man 1

Man 2

Dogs 1

Dog 2

AI or Not?

Rule of Thumb: If something looks almost too perfect, too weird, or just a little off, it might be AI.

Train 1 - REAL

Train 2 - AI Unreadable words.

Check for blurry or unreadable signs. The steam is coming from the middle of the train. Check for weird backgrounds.

Man 1 - AI Man Has 2 Thumbs

AI often struggles with fingers! Too many fingers
Fingers bent strangely or melted together. Fingers doing impossible things (like bending backwards).

Man 2 - REAL

Dogs 1 - AI Could this happen in real life?

Some images look cool, but they just don't make sense.
What to ask: Would I ever see this in the real world?

Dog 2 - REAL
